Hello,

Per your questions below:

- a. Yes, SFWPA has sufficient raw water supply to deliver 24 cfs at SF-14. This equals 47.6 acre feet per day.
- b. SFWPA will require 9 cfs for 10 days starting April 11th and then anticipate to reduce down to 7.0 – 7.5 cfs for the irrigation season. Essentially absorbing all losses from the contractual 11 cfs.
- c. The cost for water above the 3700 acre feet allotted in the 2005 agreement historically averaged \$67.00 AF as currently written. With the new PPA (not PG&E) there could be opportunity for a lower rate.
- d. NYWD would have to request the water from SF in order to deliver per the agreement.

Sincerely,
Rath

South Feather:

In the interest of preparing for the coming summer we have a pressing question:

Does South Feather have enough water in their reservoirs at the moment to allow Foothill Water Coalition to purchase bulk water this season?

What would be the cost involved and what do we need to know in order to make such a decision?

Thank you for your consideration.

Sincerely,

Hello Foothill Water Coalition,

The cost of raw water would be \$39 AF. If NYWD would reach out to South Feather for interest and discussion on additional water to be conveyed, the agency would be more than happy to meet and determine a fair and reasonable option for 2022.

Sincerely,

Rath Moseley

To the Directors and General Manager of the North Yuba Water District,

Foothill Water Coalition (FWC) respectfully requests North Yuba Water District (NYWD) to allow South Feather Water and Power Agency (SFWPA) to sell irrigation water to Foothill Water Coalition directly.

We, FWC, have recently received a proposal from SFWPA to buy water directly from them at \$39 per acre-foot.

SFWPA has assured us that they have available supplies for us to buy from them. And that they would be willing to get the Forbestown Ditch ready for said delivery.

We are of course delighted with this proposal.

We hereby request formally, and respectfully, that NYWD allow such waters to flow through the Forbestown Ditch, Costa Creek turnout, Dry Creek Diversion Dam, and Dobbins-Oregon House Canal to reach customers organized by Foothill Water Coalition.

We request that NYWD help expeditiously fulfill this request to convey water through NYWD facilities to FWC.

No work would be requested of NYWD, just permission.

SFWPA and FWC will take care of the details together.

Due to the critical nature of this request and the importance of this to the irrigation customers, we request that a Special Meeting be called as soon as possible to allow the SFWPA offer to proceed.

Thank you for considering,

Regards,

Re: South Feather Water and Power Agency Proposal

Dear Sr/Madam:

Please provide me with a copy of the South Feather Water and Power Agency's "proposal" to sell Foothill Water Coalition water at \$39.00 per acre-foot as stated in your attached letter.

Thank you for your attention to this matter.

Very truly yours,

Michael E. Vergara
