**Subject:** RE: CEQA Documents

Hi Jeff,

We have yet to complete the environmental documentation for the Ditch project; although we have been working on the biological report as well as the CEQA Checklist and the Environmental Package for the SWRCB. Once we have completed the drafts and have gone through both our internal QA/QC and your review, they will be submitted to the SWRCB for review and comment. Once comments from the SWRCB have been incorporated into the documents, I envision the documents would be ready for Board input and comment prior to releasing them for the 30-day public review period.

This is typically the process, so that all the appropriate mitigation and refinements to the project as well as the environmental analysis are made and the Board would have the most current version that includes input from the SWRCB.

Let me know if we need to discuss more.

Good morning Kamie

Neil thought you might want to see this request from my new board member. Please give me a call so we can discuss your thoughts.
