

The overall objective from hydropower producers is to gain adoption by state energy standards that hydro is recognized as carbon-free and a renewable resource.

SFWPA Asset Profile:

Kelly Ridge Powerhouse 10.9MW (recognized as renewable)

Sly Creek Powerhouse 13.5MW (recognized as renewable)

Forbestown Powerhouse 39.7MW (not currently recognized as renewable)

Woodleaf Powerhouse 61.0MW (not currently recognized as renewable)

Agency focus is to achieve recognition of all hydro assets as carbon-free renewable energy.

North Yuba Water District Advisory Committee

As discussed at May's Board meeting, I reached out to the General Manager of North Yuba Water District requesting consideration of a dual district advisory committee. Below is the e-mail exchange and I anticipate feedback after NYWD's next regularly scheduled board meeting.

Good afternoon Rath

I will

Jeffrey Maupin

General Manager

North Yuba Water District

Office (530) 675-2567

Subject: Advisory Committee

Hello Jeff,

At SFWPA's Board meeting, yesterday I was directed to reach out to you and request starting an advisory committee. Participation would be you and I, plus two Board members from each district so that we can enhance communication on the current 2005 agreement/partnership as well as updating NYWD on the status of the new FERC license and the future of hydro energy and power purchase work that is being performed to both protect and enhance revenue streams. Short and Long term water transfers would also be a good topic of discussion as well.

For SFWPA, the team would be myself, Director Tod Hickman, Director Dennis Moreland or Director John Starr based on availability.

Will you please reach out to your Director's for interest in forming an advisory committee on the topics mentioned above or any other topics of interest.

Sincerely,

Rath Moseley

General Manager

South Feather Water & Power Agency
